

The six primary predictive comparisons

Model default over situation

Answer revelation

$p_h=5.12e-10$

Reasoning elicitation

$p_h=3.88e-24$

Affect acknowledgement

$p_h=3e-07$

0.000 0.025 0.050 0.075 0.100 0.125 0.150

Absolute Brier improvement →

Student-state pattern over model × subject

$p_h=0.326$

$p_h=0.641$

$p_h=0.000192$

0.000 0.005 0.010 0.015

Absolute Brier improvement →

Intervals: 95% source bootstrap. p_h : one-sided p-value, Holm-adjusted across all six tests.
